Maintenance of Certification in dermatology: 
Requirements for diplomats

Erik Stratman, MD,a Robert S. Kirsner, MD, PhD,b and Thomas D. Horn, MD, MBAc,d
Marshfield, Wisconsin; Miami, Florida; and Boston, Massachusetts

CME INSTRUCTIONS

The following is a journal-based CME activity presented by the American Academy of Dermatology and is made up of four phases:

1. Reading of the CME Information (delineated below)
2. Reading of the Source Article
3. Achievement of a 70% or higher on the online Case-based Post Test
4. Completion of the Journal CME Evaluation

CME INFORMATION AND DISCLOSURES

Statement of Need:
The American Academy of Dermatology bases its CME activities on the Academy’s core curriculum, identified professional practice gaps, the educational needs which underlie these gaps, and emerging clinical research findings. Learners should reflect upon clinical and scientific information presented in the article and determine the need for further study.

Target Audience:
Dermatologists and others involved in the delivery of dermatologic care.

Accreditation
The American Academy of Dermatology is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

AMA PRA Credit Designation
The American Academy of Dermatology designates this journal-based CME activity for a maximum of 1 AAD PRA Category 1 CreditSM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

AAD Recognized Credit
This journal-based CME activity is recognized by the American Academy of Dermatology for 1 AAD Credit and may be used toward the American Academy of Dermatology’s Continuing Medical Education Award.

Disclaimer:
The American Academy of Dermatology is not responsible for statements made by the author(s). Statements or opinions expressed in this activity reflect the views of the author(s) and do not reflect the official policy of the American Academy of Dermatology. The information provided in this CME activity is for continuing education purposes only and is not meant to substitute for the independent medical judgment of a healthcare provider relative to the diagnostic, management, and treatment options of a specific patient’s medical condition.

Disclosures
Editors
The editors involved with this CME activity and all content validation/peer reviewers of this journal-based CME activity have reported no relevant financial relationships with commercial interest(s).

Authors
Dr. Horn is Executive Director of the American Board of Dermatology. The other authors of this journal-based CME activity have reported no relevant financial relationships with commercial interest(s).

Planners
The planners involved with this journal-based CME activity have reported no relevant financial relationships with commercial interest(s). The editorial and education staff involved with this journal-based CME activity have reported no relevant financial relationships with commercial interest(s).

Resolution of Conflicts of Interest
In accordance with the ACCME Standards for Commercial Support of CME, the American Academy of Dermatology has implemented mechanisms, prior to the planning and implementation of this Journal-based CME activity, to identify and mitigate conflicts of interest for all individuals in a position to control the content of this Journal-based CME activity.

Learning Objectives
After completing this learning activity, participants should be able to identify the requirements for participation in Maintenance of Certification for dermatologists.

Date of release: July 2013
Expiration date: July 2016

Technical requirements:
American Academy of Dermatology:
• Supported browsers: FireFox (5 and higher), Google Chrome (5 and higher), Internet Explorer (7 and higher), Safari (5 and higher), Opera (10 and higher),
• JavaScript needs to be enabled.
Elsevier:
Technical Requirements
This website can be viewed on a PC or Mac. We recommend a minimum of:
• PC: Windows NT, Windows 2000, Windows ME, or Windows XP
• Mac: OS X
• 128MB RAM
• Processor speed of 500MHz or higher
• 800 x 600 color monitor
• Video or graphics card
• Sound card and speakers

American Academy of Dermatology
Phone: Toll-free: (866) 569-SKIN (7546); International: (847) 240–1280
Fax: (847) 240-1859
Mail: P.O. Box 4034; Schaumburg, IL 60168

Confidentiality Statement:
American Academy of Dermatology: POLICY ON PRIVACY AND CONFIDENTIALITY

Privacy Policy - The American Academy of Dermatology (the Academy) is committed to maintaining the privacy of the personal information of visitors to its sites. Our policies are designed to disclose the information collected and how it will be used. This policy applies solely to the information provided while visiting this website: the terms of the privacy policy do not govern personal information furnished through any means other than this website (such as by telephone or mail).

E-mail Addresses and Other Personal Information - Personal information such as postal and e-mail address may be used internally for maintaining member records, marketing purposes, and alerting customers or members of additional services available. Phone numbers may also be used by the Academy when questions about products or services ordered arise. The Academy will not reveal any information about an individual user to third parties except to comply with applicable laws or valid legal processes.

Cookies - A cookie is a small file stored on the site user’s computer or Web server and is used to aid Web navigation. Session cookies are temporary files created when a user signs in on the website or uses the personalized features (such as keeping track of items in the shopping cart). Session cookies are removed when a user logs off or when the browser is closed. Persistent cookies are permanent files and must be deleted manually. Tracking or other information collected from persistent cookies or any session cookie is used strictly for the user’s efficient navigation of the site.

Links - This site may contain links to other sites. The Academy is not responsible for the privacy practices or the content of such websites.

Children - This website is not designed or intended to attract children under the age of 13. The Academy does not collect personal information from anyone it knows is under the age of 13.

Elsevier: http://www.elsevier.com/wps/find/privacypolicy.cws_home/privacypolicy
Since 2006, after completing a cognitive certifying or recertifying examination, dermatologists are automatically enrolled into Maintenance of Certification (MOC) and can access a personalized electronic table (at www.abderm.org) that presents the requirements over the 10-year cycle. On this web site, diplomates can also pay the annual fee and attest to completion of the various components. Clicking on hyperlinks in the table launches explanations of the requirements. A hyperlink below the table takes the reader to the various resources approved for completion of the MOC requirements. There is a login tab in the upper left corner with a login help feature below. Clicking on the MOC tab will bring up the table. The timeline is specific to the individual. (J Am Acad Dermatol 2013;69:13.e1–4.)

**Key words:** American Board of Dermatology; American Board of Medical Specialties; dermatology; maintenance of certification; maintenance of licensure.

**HOW DOES A DIPLOMATE PARTICIPATE IN MAINTENANCE OF CERTIFICATION?**

**Key point**
- A table exists (www.abderm.org) for documentation of completion of the various Maintenance of Certification components

Since 2006, after completing a cognitive certifying or recertifying examination, dermatologists are automatically enrolled into Maintenance of Certification (MOC) and can access a personalized electronic table (at www.abderm.org; Fig 1) that presents the requirements over the 10-year cycle. On this web site, diplomates can also pay the annual fee and attest to completion of the various components. Clicking on hyperlinks in the table launches explanations of the requirements. A hyperlink below the table takes the reader to the various resources approved for completion of the MOC requirements. There is a login tab in the upper left corner with a login help feature below. Clicking on the MOC tab will bring up the table. The timeline is specific to the individual.

**PART 1: LICENSURE AND PROFESSIONAL STANDING**

**Key point**
- Annual requirements consist of state licensure attestation, reporting clinically active status, and payment of the annual Maintenance of Certification fee

Before January 31 of each year, the MOC-enrolled diplomate must attest that all state medical licenses are current and unrestricted and inform the American Board of Dermatology (ABD) that he or she is clinically active (defined as having provided any patient care, in any setting, in the preceding 24 months) through an online attestation process found on the diplomate’s web-based MOC table. The $150 annual MOC fee may be paid at any time during the calendar year, but is due no later than December 31. The fee is used to administer the MOC program, including ensuring psychometrically and scientifically valid, reliable examinations.

**PART 2: LIFELONG LEARNING AND SELF-ASSESSMENT**

**Key point**
- Periodic self-assessments and a patient safety module comprise this component

Two components comprise this part—periodic self-assessment and the patient safety self-assessment module. Periodic self-assessment requirement consists of three 100-question modules completed in years 1 to 3, 4 to 6, and 7 to 10, respectively. The 100-question target may be accrued in smaller increments over each of these periods. The MOC table allows the diplomate to attest to each completed self-assessment exercise. Sponsors of these activities, including the

Dr Stratman is the principal author of the patient safety module currently used in Maintenance of Certification, participates in program development for the Skin Disease Education Foundation Maintenance of Certification self-assessment program, and
American Academy of Dermatology (AAD), state medical societies, specialty societies, and medical education companies, must be approved by the ABD to offer MOC credit. Qualifying activities are listed in the resource section for each enrolled diplomate. The models are designed to accomplish 3 things: identify relevant gaps in the diplomate’s knowledge, provide information to help close the individual’s knowledge gap, and to offer comparison data to other diplomates. No minimum score is required to receive credit for this type of self-assessment activity, because the purpose is to identify relevant areas that physicians need to improve rather than showing knowledge mastery.

Completion of the patient safety module is required within 2 years of entering MOC. The American Board of Medical Specialties (ABMS) has published extensive curriculum requirements for MOC patient safety modules, and must approve all submissions before MOC credit can be awarded. The AAD is approved for a dermatology-specific patient safety module now available. Unlike the other self-assessment modules, patient safety modules require passing scores to receive MOC credit.

**PART 3: COGNITIVE EXPERTISE**

**Key point**

- The knowledge-based examination may be taken at any time from years 3 to 10 in the **Maintenance of Certification cycle**

Cognitive expertise is shown through a knowledge-based examination. Passing the examination was the major event for entry into MOC and the capstone of the 10-year cycle. The Board allows entry into MOC without taking an examination for lifetime certificate holders, diplomates who may wish or need to enter early in order to pursue enhanced Centers for Medicare and Medicaid Services reimbursement, or because of various state or institutional requirements. Once enrolled in MOC, the examination may be taken at any point during years 3 to 10 of the cycle. If taken early, no more than 12 years may elapse before the next examination is taken. For example, if a diplomate in her fourth year of the MOC cycle takes and passes the MOC examination in 2013, successful retaking of the examination must occur no later than the end of 2025. Diplomates with time-limited certificates who recertified before 2006 but could not yet enter MOC have the option of taking the examination in the 3 years...
preceding the 10-year deadline but will not enter MOC until the year after their certificate expires. For example, a diplomate who certified or recertified in 2004 may take the examination in 2012, 2013, or 2014. Despite passing the examination in 2013, this individual would only enter MOC in 2015. The certificate cycle does not change based upon timing of the examination. Individuals actively participating in MOC will no longer pay an examination fee to satisfy the general dermatology certificate beginning in 2016.

Everyone must take and pass a general dermatology module consisting of 100 clinical images followed by a question asking for the most likely diagnosis among 5 listed choices. A list of diagnoses (eg, lichen planus, porphyria cutanea tarda) and diagnostic categories (eg, cutaneous signs of endocrine disorders) from which the images will be chosen is posted on the ABD website at least 6 months in advance and provided to dermatology organizations who prepare focused board preparation activities. In addition, passing a second emphasis area examination module is also required. Choices include medical dermatology, dermatopathology, surgical dermatology, and pediatric dermatology. Presently, these modules consist of 50 items taken from a published list of 75 to 100 questions also posted on the ABD website at least 6 months in advance and provided to these organizations. These items are a mix of images and written questions all in the “one-best-answer” format.

For doubly certified individuals (eg, dermatology and dermatopathology), the addition of a second 50-question subspecialty module is offered during the same administration. Passing the general dermatology, emphasis area, and subspecialty modules covers the general dermatology certificate and the subspecialty certificate.

Examinations are currently given at PearsonVue centers across the country during a 15-day window each spring.

PART 4: EVALUATION OF PERFORMANCE

Key point

- Over 10 years, diplomates must complete 2 practice performance exercises, 2 patient communication surveys, and 2 peer communication surveys

Three components comprise part 4: practice performance assessments, patient communication surveys, and peer communication surveys. Two practice performance assessments must be completed during each 10-year cycle (1 in years 1-5; another in years 6-10). Meant as an opportunity to reflect on what might be improved in the care delivered, the structure simulates the “plan-do-study-act” model of quality improvement. This includes selecting the measure to improve, measurement of the baseline performance with this measure before making any interventions, crafting and implementing a plan to improve the measure, allowing time to pass with the interventions in place, remeasuring the interval performance, and reflecting on the impact of the project. This type of activity is different than most types of educational experiences of the practicing dermatologist. Practice assessments require the dermatologist to analyze data relevant to his or her own practice. This might include, for example, determining the number of melanoma patients who did not have a documented full body skin examination performed at their last follow-up or the percentage of patients taking chronic prednisone who are not taking bone protective measures.

Several resources to complete these exercises are offered by the AAD. The ABD approves practice performance assessment tools and processes before MOC credit can be obtained. In addition, the ABD accepts successful completion of practice performance assessments offered by other ABMS member boards.

Surveys of patients and peers must also be completed twice per 10-year cycle, once in years 1 to 5 and again in years 6 to 10. The focus of these surveys must be on the patient experience of care, with both emphasizing physician communication skills. Forty-five patient responses and 12 peer responses are required for successful completion. Peers may include coworkers, including physicians, allied providers, and nursing staff. These individuals must be sufficiently knowledgeable of your current practice to assess your communication competence. Applications for survey instruments must be approved by the ABMS before being offered as “MOC-qualifying.”

The resource page on the ABD web site lists approved surveys, including ABD-sponsored patient and peer web-based surveys offered at no cost to diplomates. E-mail addresses for a minimum of 90 patients are necessary for the patient survey. Most large institutions use patient satisfaction surveys from third-party vendors that adequately assess physician communication skills, and some have been vetted by the ABD.
